EDUCATION

GL Bajaj Institute of Technology and Management **Oct 2023 – July 2027**

Bachelor of Technology – Computer Science and Engineering; GPA: 8.61

- **Courses:** Operating Systems, Data Structures, Analysis of Algorithms, Artificial Intelligence, Machine Learning, Networking, Database

Senior School Certificate Examination — 94.2% **Apr 2020 – Mar 2022**

Higher School Examination — 94.6% **Apr 2018 – Mar 2020**

SKILLS SUMMARY

Languages: C++, Java, Python, SQL, JavaScript

CS Concepts: Data Structures & Algorithms, Object-Oriented Programming (OOP), Database Management Systems (DBMS), Operating Systems, Computer Networks, Software Engineering, SDLC, Artificial Intelligence, Machine Learning

Backend: Node.js, Express.js, React.js

Databases: MySQL, PostgreSQL, MongoDB

AI/ML: TensorFlow, Keras, Scikit-learn, NumPy, Pandas, Google Gemini API

Tools: Git, GitHub, VS Code

Soft Skills: Communication, Problem Solving, Teamwork, Analytical Thinking, Time Management

PROJECTS

MockMate-AI – Personalized Interviewer **Live | GitHub**

Tech Stack: React.js, Node.js, Google Gemini API

- Developed a web application that helps candidates practice for their interviews in a realistic and conversational tone, instead of relying on standard questions for interviews.
- Implemented a chat-based system using Google Gemini API, where the AI conducts interviews, asks questions, and provides a performance score at the end.
- Deployed a live, login-based web application that simulates realistic interview sessions, making practice accessible and engaging to candidates.

FixMyCity – AI-Powered Civic Issue Reporting Platform (Ongoing)

Tech Stack: Next.js, Google Gemini API, Tailwind CSS

- Designed and developed a scalable full-stack civic issue reporting platform using Next.js and Google Gemini API.
- Implemented secure authentication, role-based authorization and real-time complaint tracking with relational database integration.

EmotionSense – Real-Time Facial Emotion Recognition

Live | GitHub

Tech Stack: Python, TensorFlow, OpenCV, Keras

- Developed a CNN-based facial emotion recognition system to classify emotions such as happy, sad, angry, fear, and surprise from real-time webcam input with 83% accuracy.
- Built an end-to-end computer vision pipeline using OpenCV and TensorFlow for real-time facial emotion recognition and healthcare-focused analytics.

CODING ACHIEVEMENTS

- Solved 500+ Data Structures and Algorithms (DSA) problems across LeetCode, CodeChef, and other competitive programming platforms.
- Achieved a maximum LeetCode Contest Rating of 1707 and earned the LeetCode 100 Days Badge for consistent problem-solving.
- Participated in 25+ competitive programming contests, strengthening algorithmic thinking and coding skills.

VOLUNTEER EXPERIENCE

Event Volunteer | College Technical Fest — Feb 2025 – Sep 2025

- Collaborated with a team to ensure smooth execution of competitions and technical sessions.

LANGUAGES

English, Hindi
